

**Fairfield Rotary & Fairfield Police
to register children in AMBER Alert ID Program, Sponsored by Wells Fargo Bank**

(Fairfield, CT) — The Fairfield Rotary Club, in cooperation with the Fairfield Police Department, will be registering children in the AMBER Alert emergency response system on Saturday, January 28th from 11 AM to 3 PM at the Fairfield Museum & History Center located at 370 Beach Road in Fairfield.

Over the past two years, the Fairfield Rotary Club has registered over 1,200 children at five prior events. This event allows parents the opportunity to register their children up to the age of 18 in the database and obtain an identification card. During registration a picture is taken and a description of the child is logged into the nationwide confidential database. The AMBER Alert database is used and accessed by various local authorities in the event a child is missing. Only a photo, description of the child and a date of birth are put on the ID. There is no name, address or phone number on the card.

The goal of the AMBER Alert System, named for 9-year old Amber Hagerman, is to instantly notify the entire state, so everyone may assist in the search for the safe return of the child. The public immediately becomes the ears and eyes of law enforcement and can assist in the search for the missing child. AMBER Alert programs have helped save the lives of over 350 children nationwide. Over 90 percent of those recoveries have occurred since October 2002.

The Rotary Clubs and Fairfield Police Department are being assisted by the Danbury Rotary Club which is providing the customized computer terminals and photography equipment.

The event is sponsored by Wells Fargo Bank. Their sponsorship will allow for registration to be free, though additional identification cards cost \$2.

The registration is a first-come, first-served event; all are welcome and encouraged to participate. For further information please go to www.fairfieldrotary.org/ or contact Ben Williamson at benwilliamson@jbw1.com.
