

AP Environmental Science

Summer Assignment Part 1:

You will be expected to read and take notes on the first 2 chapters of the text-book, Living in the Environment 15th Edition, by Miller.

Summer Assignment Part 2:

Timothy Egan wrote a book, “The Worst Hard Time: The Untold Story of Those Who Survived the Great American Dust Bowl.” This book is an extraordinary account of how the Great Plains in North America were used from the times of the Native Americans to the formation of the Dust Bowl. This is especially relevant as the area affected during the Dust Bowl is facing a drought right now. You are expected to read the entire text.

What will be graded?

The text reading is being assigned to save time during the school-year. You are expected to read the chapters and be prepared to ask questions the first days of school.

During the first days of school you will be asked to work on, and complete, questions related to Egan’s book. Some questions will be worked on in class, others outside of class. What you need to do this summer is read what is assigned and come to school prepared to discuss it.

If you have any questions this summer, please feel free to contact your teacher.
