PRESS RELEASE  
August 3, 2012

## OSBORN HILL SCHOOL UPDATE

On August 1, 2012 a meeting was held at Osborn Hill School with representatives from the Connecticut Department of Energy and Environmental Protection, Connecticut Department of Public Health, U.S. Environmental Protection Agency, the Town of Fairfield Health Director, Osborn Hill School Principal Frank Arnone, Central Office administration and our consultants AMC Environmental, AAIS Corporation, and Indoor Air Technologies to discuss the ongoing situation involving PCB hazardous material testing as part of the window replacement project. The purpose of the meeting was to involve all of the agencies listed above in a coordinated effort to provide a safe environment at Osborn Hill for the upcoming school year.

The most recent air quality results showed improvement, and the consultants were given direction by the DEEP and EPA regarding next steps, which include specialized cleaning and further testing. The goal of Fairfield Public Schools is to provide a safe learning environment at Osborn Hill for staff and students.

An informational forum for the public is scheduled for August 15 with representatives from the agencies mentioned above available to answer questions and provide additional information. Specific information about the forum will be forthcoming and posted on the district's website as soon as it is available. Additional test results and facts about PCBs are posted on the district's website and updated weekly. The Fairfield Public Schools is making every effort to share current and accurate information with the community as it becomes available.
