POSITION: **WEBMASTER**

REPORTS TO: **APPLICATION INTEGRATION SPECIALIST**

MAJOR RESPONSIBILITIES: The Webmaster is responsible for the operation and user navigation of the various Fairfield Public School's websites. The Webmaster will monitor, improve and update the performance of the existing Web sites by working with and supporting a variety of users and contributors.

RESPONSIBILITIES WILL INCLUDE: The following are illustrative of the current responsibilities. This is position and responsibilities may be modified based on needs of the District.

- Responsible for implementing the ongoing development of the district's website, school websites, and microsites.
- Supporting and training users and super users who independently post to the sites,
- Recommending and implementing district standards for design,
- Performing navigation and browser compatibility,
- Performing quality-control for third party content,
- Maintaining and develop small web applications such as interactive forms or surveys.
- Documentation of best practices and write maintainable HTML code with comment tags,
- Other projects or tasks as assigned.

CREDENTIALS, QUALIFICATIONS & SKILLS:

BA required in a related field of study or equivalent experience.

Knowledgeable in web design and posting tools, including Adobe Contribute, Fireworks, Flash, Photoshop, and Dreamweaver.

Thorough knowledge of HTML, CSS, and JavaScript. Understand limitations and cross-browser compatibility.

Ability to read and write PHP/MySQL in a MVC and OOP approach.

Experience with various software packages including Lime Survey and WordPress; and the ability to modify the core functionality of each.

Developing native apps for iOS is a plus.

Experience with any of the following is a plus: AJAX, XML, JSON, jQuery CodeIgniter, PhoneGap, Xcode, iWebKit, Red5

Demonstrate technical abilities and skills.

Proven ability to work independently as well as a team member.

PHP TEST:

Many of our websites and microsites use PHP. Please review the code below before applying for this position.

```
<?php

if (!empty($_GET['web'])) {
    $web = $_GET["web"];
} else {
    $web = "try again";
}

function webmaster($web) {
    if ($web == 'master') {
        $test = base64_decode('YmFuYW5h');
    } else {
        $test = "This is not the code word, please try again.";
    }
    return $test;
}

$skills = array("HTML", "CSS", "Javascript", "PHP", "MySQL");
echo "<h3>We are seeking a Webmaster with the following skills:</h3><ul>";
foreach ($skills as &$value) {
    echo "<li>$value</li>";
}
echo "</ul>";
echo "<p>If you possess these skills, please apply and include the \"Code Word\" in your application</p>";
echo "<p>Code Word: <strong>" . webmaster($web) . "</strong></p>";

?>
```
